## Summary

Machine Learning Engineer with experience spanning production computer vision, ML infrastructure, research software, and academic machine learning research. Currently building end-to-end ML systems for industrial computer vision, including training and evaluation pipelines, edge deployment, and GPU inference.

## Work Experience

### Optocycle GmbH, Machine Learning Engineer

Germany  
02/2024 – Present

- Built most of the company's ML infrastructure from the ground up, covering data collection and annotation, training, experiment tracking, evaluation, deployment, and production inference
- Developed computer-vision systems for classification, anomaly detection, object detection, and segmentation using datasets with 400K+ annotated images
- Deployed models across 30+ industrial sites processing 800K+ frames per day, optimizing edge inference with ONNX and TensorRT and introducing NVIDIA Triton Inference Server for shared GPU inference
- Led development of a plastics-classification system using multispectral vision, including analysis of RGB versus multispectral performance

### Scholar Inbox, Research Engineer

Germany  
06/2021 – Present

- Built and maintained major parts of Scholar Inbox, a scientific-paper recommendation platform used by 30K+ researchers
- Developed backend and frontend systems and the personalized recommendation pipeline over a corpus of approximately 3M scientific articles
- Optimized SQL queries and the embedding storage system, achieving a 5× improvement in latency and memory usage

## Publications

### Scholar Inbox: Personalized Paper Recommendations for Scientists

ACL System

2025

Demonstrations

M. Flicke, G. Angrabeit, M. Iyengar, V. Protsenko, I. Shakun, **J. Cicvaric**, B. Kargi, H. He, L. Schuler, L. Scholz, K. Agnihotri, Y. Cao, A. Geiger

### Generative Dataset Distillation: A New Hope?

Workshop on the Dataset Distillation

2024

Challenge, ECCV 2024

M. Schneider\*, **J. Cicvaric\***, A. Sauer, A. Geiger, K. Chitta

- **Best Paper Award**, ranked **2nd** at the ECCV 2024 Dataset Distillation Challenge Workshop

## Education

### MS University of Tübingen, Machine Learning

11/2020 – 05/2023

- GPA: 1.1 (best: 1.0), graduated with distinction
- Master's thesis: [Generative Dataset Distillation](#) [🔗](#)

### BS Moscow Institute of Physics and Technology, Applied Mathematics and Physics

09/2016 – 07/2020

- GPA: 4.66 (best: 5.0)

## Skills

### Machine Learning & Computer Vision

Python, PyTorch, OpenCV, Scikit-learn, NumPy, pandas, Optuna

### ML Systems & Deployment

MLflow, NVIDIA Triton Inference Server, ONNX, TensorRT, Docker, Kubernetes, Helm, NVIDIA Jetson

### Data & Backend

PostgreSQL, MongoDB, SQLite, RabbitMQ, Celery, Redis, Flask, Git

### Languages

English (Fluent), German (Intermediate), Serbian (Native), Russian (Native)
